WORK EXPERIENCE

DRTALKS | Full-Stack Developer
Jan 2023 – Present | Remote (Carlsbad, California)

- Collaborates closely with the design team to implement a responsive and user-friendly interface while building custom themes
- Generates pages using MERN stack, which processes URL query parameters from our MongoDB database before rendering them in our WordPress site
- Integrates third-party APIs like MongoDB for our database queries to ensures a seamless user experience and improved page load times
- Develops the migration of existing WordPress sites to the WordPress Headless architecture, ensuring a smooth transition and minimal disruption to users

DTC MARKETING | Senior Web Developer
Dec 2021 – Nov 2022 | Remote (Canada)

- Turns Figma design files to a working WordPress site
- Uses Custom WordPress Theme or builder like Elementor or Divi depending on client's preference
- Updates plugins in all of the client's websites and handles their bug issues both frontend and backend
- Prioritizes new web development projects, setting timelines and assigning tasks to team members
- Ensures to provide a software documentation before the launch of the website

SINGLEMIND CONSULTING | Web Developer
Mar 2021 – Dec 2022 | Remote (Oregon, Portland)

- Develops custom template and custom post on the company's Wordpress website
- Ensures that the website is mobile responsive and well coded with the latest Wordpress hooks
- Creates documentation for all the issues that is encountered when developing the website
